HSR Layout, Bengaluru

Looking forward to leading teams and organizations towards technically improvising my nation as a long-term goal. Meanwhile in this process, learning from my failures and imparting my experiences to my kith and kin.

WORK BY RECENCY

Listings & Discovery Core — *User listings and their discoveries*

- Leading the development of core features across platforms for NoBroker.

FortyBits — *A bit of contribution to the community*

- Contributions towards the community for reuse and learnings keeping pace with the updated technologies based on my self-gained experiences.

Survey Platform — *Q&A support to capture user inputs*

- Developed backend service to support Q&A integration with Flipkart applications.

Collection Personalisation — *Bottomsheet for user preferences*

- Designed, collated, and deployed services to persist a user's currently preferred collections. - Build upon an algorithm to facilitate user choices with pseudo-AI.

User Feeds — *Feed system for commerce and transaction*

- Design and solution for the user's timeline experience. - Work on content processing during the creation flow on Flipkart studio. - Work on persona recommendation and feedback pipeline for creators.

Gamezone — *Gamification channel for user engagement*

- Complete ownership of the Gamezone. - Work on the campaign management life cycle. - Build onto test non-functional aspects of QuizTime.
